

Setting Up Application Environment

IBM Cloud CLI

Date	03 November 2022
Team ID	PNT2022TMID25604
Project Name	Smart Fashion Recommender Application
Maximum Marks	2 Marks

The screenshot shows a web browser displaying the IBM Cloud CLI documentation. The page title is "Getting started with the IBM Cloud CLI". The main content area includes a list of tools to install: `git`, `Docker`, `helm`, `kubectl`, `curl` (Linux only), and several IBM Cloud plug-ins: `IBM Cloud Functions plug-in`, `IBM Cloud Object Storage plug-in`, `IBM Cloud Container Registry plug-in`, and `IBM Cloud Kubernetes Service plug-in`. A tip box suggests trying out IBM Cloud Shell for a personal cloud-based shell workspace. The left sidebar contains a navigation menu with sections like "Get started" and "How to". The right sidebar shows a "On this page" section with a list of steps: "Before you begin", "Step 1: Run the installation command", "Step 2: Verify the installation", "Step 3: Install CLI plug-ins and tools", "Step 4: Configure your environment", and "Next steps".
